Milk Coolers - Single Sided Door

*Milk Coolers
 Super Deluxe Series*

Patented Self-Cleaning Condenser

This product is equipped with a fine mesh filter to the front of the condenser to catch dust, and a rotating brush that moves up and down daily to remove excess buildup outward and away.

**Model : TMKC-58S-N-WA
 TMKC-58S-N-WS
 TMKC-58S-N-SS**

FEATURES & BENEFITS

Self-Cleaning Condenser

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

Hydrocarbon refrigerants (R-290)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet the new standards of the EPA and DOE in 2017. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

Convenient bottom floor drain standard with hose adapter

Floor drain is located in the rear on the right hand side for easy clean out. The hose adapter allows for convenient connecting to drain hose.

Stainless steel self-service doors have drop front feature and hold-open flip-up top lid

Exterior digital thermometer standard for easy visibility

Exterior digital temperature display allows easy reading and precise and constant temperature. This level of precision allows milk to remain fresh and safe over an extended period of time.

Sturdy and clean, durable cabinet construction

Exterior is stainless steel or white coated steel with stainless steel door. Interior is comprised of stainless steel.

High-density polyurethane insulation

The entire cabinet construction is foamed-in-place using high density, environmental friendly CFC free polyurethane insulation.

4" dia. swivel casters standard for easy movement, two with brakes to lock the unit in place

Refrigerator holds 33°F ~ 38°F for the best in milk preservation
